

Working package 1. Theoretical framework for the research

1.1 Analysing the existing mechanisms for preventing, identifying and dealing with academic misconduct

In order to better understand the existing situation on the national and international level, we will carry out an analysis of the existing policies referring to preventing, identifying and dealing with academic misconduct. It will also include a detailed overview of the national legislation and mechanisms of prevention of academic misconduct. This activity will also include the review of documents (reports, recommendations, guidelines) from EHEA. Analysing issues regarding anti-plagiarism i software possibilities. Analysing good practice examples of EU universities and research institutions. The overall, it would serve for identifying focal points for the research.

1.2 Making literature review about academic integrity

A critical overview of relevant research. Identifying key terms, their definition and creating appropriate research methodology. Finding recent research papers on academic integrity. Identifying key terms and research variables, comparing results and methodologies. Hypotheses development (problem-based issues) for this research.
