

Working package 3. Research oriented dissemination activities

3.1 Research stays/conferences and study visits

By engaging in international activities in the field such as conferences, summer schools and research stays, project researchers will strengthen the expertise in the field, which will be further reflected in the quality of the project deliverables. This will further foster networking with EU universities and colleagues and contribute to the international visibility of the project.

3.2 Research publications

There will be no less than 10 research papers, 1 monograph book, 1 PhD thesis and 1 Conference Book as the outcomes of the project which will contribute to the international dissemination of the project results and activities. Noteworthy, up to our knowledge it would be first PhD thesis that mainly analyse issue related academic integrity.

3.3. Organizing international scientific conference

Organizing international scientific conference at the University of Montenegro with the main topic: Academic integrity in higher education and research.
