

## **Working package 7. Quality Assurance**

### **7.1 Development and adoption of Internal Quality Plan**

Internal Quality Plan will be developed, encompassing standardized forms for project deliverables, event evaluation forms, etc. It will enable day-to-day monitoring implementation of project deliverables. In addition, annual quality assurance reports will be developed, as a tool for quality management.

### **7.2. Further development and evaluation of Internal Quality Plan**

Through the Project life time, it's necessary to make further development of Internal Quality Plan with the aims of the Project Quality Assurance and continual evaluation and monitoring of the each planned activity.
